---

### PROFESSIONAL SUMMARY

Data-driven Python Developer with +3 years of experience building automation solutions, ETL pipelines, and intelligent systems. Proven track record of developing production-grade applications using Python, Streamlit, FastAPI, and AI-powered RAG architectures. Passionate about transforming complex data into actionable insights through robust, scalable solutions that drive operational efficiency. Background in Information & Control Management with a strong foundation in data analytics, business intelligence, and process optimization.

---

### TECHNICAL SKILLS

**Languages & Core:** Python, SQL, JavaScript (basic)

**Frameworks & Libraries:** FastAPI, Streamlit, CustomTkinter, LangChain, Pandas, Polars

**Data & AI:** ETL/ELT Pipelines, ChromaDB (Vector DB), RAG Architecture, Google Gemini AI, OCR (Tesseract)

**Databases:** SQLite, PostgreSQL, MySQL, SQL Server

**Tools & Platforms:** Docker, Git/GitHub, Power BI, Excel (Intermediate), BPMN 2.0

---

### PROFESSIONAL EXPERIENCE

#### Analista Administrativo Financiero

Consultorio Jurídico "Vidal-Escalante & Asociados" | May 2022 – Oct 2025

- Designed and built ETL data pipelines from ERP systems, enabling real-time financial analytics and reporting.
- Developed interactive Power BI and Python-based dashboards for executive decision-making, improving data visibility across departments.
- Automated financial reporting processes using Python and SQL, reducing monthly close cycle time by 40%.
- Architected a document management system for physical and digital records, improving retrieval efficiency.
- Created BPMN process diagrams and SOP documentation to standardize administrative and operational workflows.

- Managed full-cycle accounting operations including bank reconciliations, cash flow control, and financial statement preparation.

## Pasante Administrativo Contable

Consultorio Jurídico "Vidal-Escalante & Asociados" | Feb 2022 – May 2022

Supported accounting records, account reconciliations, and led the initial company database creation project that laid the groundwork for future data-driven operations.

---

## FEATURED PROJECTS

### HR Buddy — RAG-Powered HR Assistant

*Tech: FastAPI, LangChain, ChromaDB, Google Gemini AI, Docker*

Built a production-grade Retrieval-Augmented Generation (RAG) system for HR self-service. Features include secure JWT cookie-based authentication, semantic search over company manuals, and real-time AI responses. Architected with zero-storage privacy and automatic session management.

[github.com/RAG-ChocolaTech](https://github.com/RAG-ChocolaTech)

### Invoice Validation & Reconciliation Tool

*Tech: Python, CustomTkinter, Tesseract OCR, Pandas, OpenPyXL*

Desktop application that automates invoice auditing by cross-referencing PDF invoices against Excel records. Dual extraction engine (native PDF + OCR for scanned documents) with intelligent NIT-priority validation logic and automated discrepancy reporting.

---

## EDUCATION

### Licenciatura en Información y Control de Gestión

Universidad Autónoma Gabriel René Moreno (UAGRM) | 2018 – 2023 | Graduación Directa con Honores

### Técnico Universitario Superior en Contabilidad

Universidad Autónoma Gabriel René Moreno (UAGRM) | 2021

---

## LANGUAGES & CORE COMPETENCIES

**Languages:** Spanish (Native) | English (Basic A2 — currently advancing)

**Core Competencies:** Process Optimization | Data Analysis & Storytelling | Problem Solving | Cross-functional Collaboration | Adaptability | Continuous Learning | Analytical Thinking | Effective Communication

---

## ADDITIONAL INFORMATION

- Open-source contributor with active GitHub portfolio showcasing end-to-end Python projects.
- Strong ability to translate business requirements into technical solutions.
- Experienced in working with cross-functional teams bridging finance, operations, and IT.
- Committed to writing clean, maintainable, and well-documented code.
